

### Contact Information for the CSITC Round Trials

Type your information and return, by email, to both [csitc-rt@faserinstitut.de](mailto:csitc-rt@faserinstitut.de) and [csitcsecretariat@icac.org](mailto:csitcsecretariat@icac.org). Enrolment of participating labs will continue year to year unless we hear to the contrary. Invoices will be emailed once a year. Please inform us of testing centre withdrawals and seasonal shut-downs well in advance. **NOTE:** Once a sample shipment is made, the testing centre is liable for the cost incurred.

**Please include our laboratory equipped with rapid testing instruments in the CSITC Round Trials.**

<b>COMPANY/ LABORATORY:</b>	
<b>Contact Person(s) for receiving samples:</b>	<b>Contact person/s for receiving invoices:</b>
<b>Full street address for sample shipping:</b>	<b>Full street address for invoice receiving:</b>
<b>Telephone (2 preferred):</b>	<b>Telephone:</b>
<b>E-mail (preferably 2 addresses):</b>	<b>E-mail:</b>
<b>Number of Instruments:</b>	

**Number of samples sets requested, per quarter:** \_\_\_\_\_ (For best testing results, the CSITC Task Force recommends not using one cotton set on more than two instruments. However, the Task Force has reluctantly agreed to allow the splitting of a set to accommodate a maximum of four instruments). The CSITC Task Force allows the publication of names of participating test centres. Individual results are not divulged.

**Centres that do not wish to be listed as participants in the CSITC Round Trials may choose to remain anonymous by checking the box below.**

<input type="checkbox"/>	<i>We do not wish to be identified as a CSITC Round Trial participant.</i>

## Special Availability of USDA Calibration Cotton Standards to CSITC Round Trial Participants

A special set of USDA calibration cotton standards (CCS) can now be obtained with the round trial samples. The CCS special set is available only to active CSITC Round Trial participants and when ordered is shipped in the same shipping package as the quarterly round trial samples. Please keep in mind that the calibration cotton is not specific for the RT participation. For the RT participation and for daily testing, the same calibration material and procedure should be used. The special set of USDA calibration cotton standards is composed of the following:

### USDA Calibration Cotton Standards Set

1 pound (0.45 kg) USDA Universal Short/Weak Calibration Cotton

1 pound (0.45 kg) USDA Universal Long/Strong Calibration Cotton

½ pound (0.225 kg) USDA Universal Low Micronaire (Gu) Calibration Cotton

½ pound (0.225 kg) USDA Universal High Micronaire (Au) Calib Cotton

This special set of USDA Calibration Cotton Standards can be purchased only through the ICAC. The total cost of the set is US\$140.00 (shipping included). Since the standards set is shipped inside the CSITC Round Trial sample box, its availability is limited to the number of round trial sets ordered per quarter. For technical questions regarding the USDA Calibration Cotton Standards, or for information on other available calibration standards, please contact [cotton.standards@ams.usda.gov](mailto:cotton.standards@ams.usda.gov).

**Thank you for your participation!**
