CSITC Round Trials

The quarterly round trials were conceived by the Task Force on Commercial Standardization of Instrument Testing of Cotton (CSITC), a working group of the ICAC, in its effort to establish international standardization of cotton classification based on the Universal Calibration Cotton Standards to promote efficiency in cotton production and marketing. Participation in the trials confirm testing centers ability to provide reproducible test measurements based on established international standards. The round trials are sponsored by Project 33 between the Common Fund for Commodities and the ICAC, involving the Bremen Fibre Institute, Germany; the Cotton Program of the United States Department of Agriculture; and the EC. Testing centers officially recognized for their participation in one or more trials in 2010 are
