

International Agricultural Training Center

International Agricultural Training Center

International Agricultural Training Center

- International Agricultural Training Center, a foundation among the Ministry of Food, Agriculture and Livestock in Turkey, and abbreviated as IATC hereafter, was founded on 2009.
- Although the institution is relatively new foundation, it has considerable experience and knowledge on training issues.

International Agricultural Training Center

- The training programs of the Center are partly sponsored by the Turkish government and include accommodation, food and guiding.

International Agricultural Training Center

- Participants receive training about advanced agricultural knowledge as well as practical skills applicable to various types of crop production.
- IATC builds capacity for sustainable development in the agriculture, food, rural development and natural resources management sectors through training and consultancy.

Mission

- Providing pre-service and in-service training to staff at all level of the ministry.
- To make or to organize solution oriented agricultural training focused on the changeable needs of non-governmental sector.

Mission

- To determine the training needs of public and non-public sector, up to date the training programs and to carry on researches for improving training efficiency, to report achieved results for decision-makers.

Mission

- To establish implementation plants, enterprises and documentation centers in relation to mission.
- To develop educational tools such as e-learning environments, distance learning system, interactive multimedia.

Mission

- To cooperate with the International Organizations in the field of training and carrying out joint training projects and programs.

IATC offers the following services:

- Technical and process advisory services
- Open access and tailor-made mid-career training programs,
- Web-based resource portals and on-line learning

IATC offers the following services:

- Policy and sector studies
- Monitoring and evaluation
- Project cycle management
- Information and knowledge management

Organizational Structure and Staff

- Trainers are mostly hired among Agricultural Engineers, Veterinary Medicines and others who are graduated from the disciplines related to agricultural curriculum (genetics, biotechnology, biosystem engineering, agronomy, economics). Also, in necessary conditions, IATC can temporarily hire foreign experts for training.
